All Shapes and Sizes

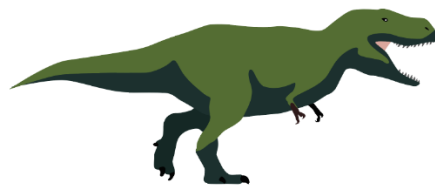

Not all dinosaurs lived at once. As the Earth changed, the types of dinosaurs living changed too. Stegosaurus were fossils by the time T-Rex was stomping around! There are over 700 different kinds of dinosaurs, and they came in all different shapes and sizes. How do you measure up to dinosaurs? Use chalk to draw dinosaur features on the pavement outside.

You'll need:

- Measuring tape
- Sidewalk chalk

What to do:

1. Compare your foot to these dinosaur footprints

42 inches

30 inches

Tyrannosaurus footprint

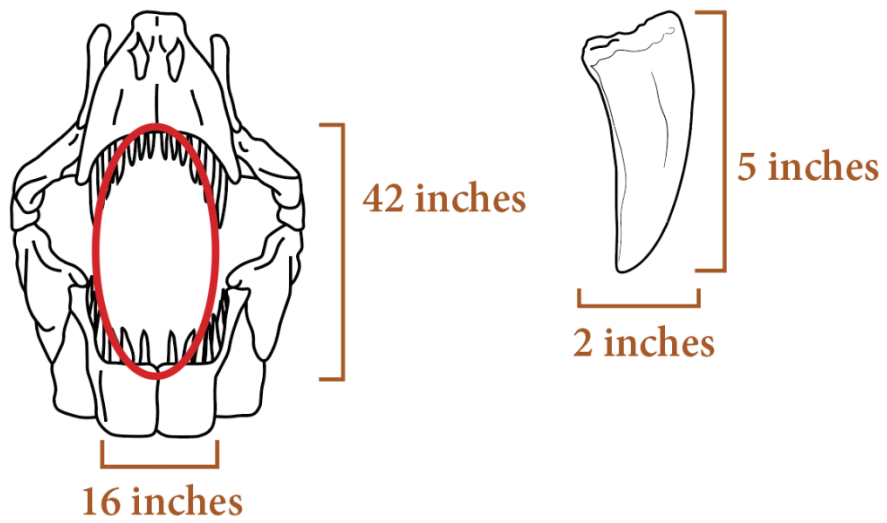

10 inches

4 inches

Deinonychus footprint

2. Could you fit inside the mouth of a T-Rex? Is a T-Rex tooth bigger than your hand?

3. Are you taller than a Coelophysis dinosaur? Try drawing the whole dinosaur with chalk.
