Move like a Mammoth

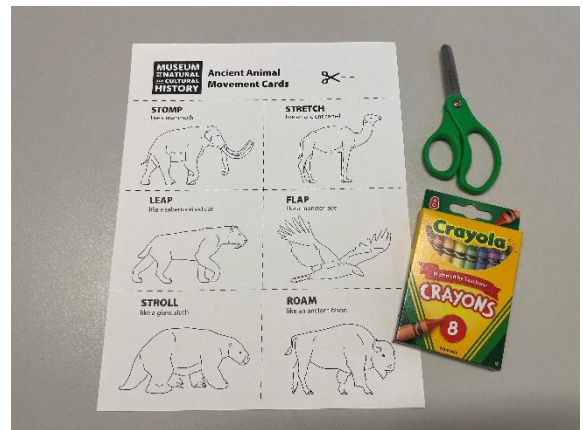

Can you pounce like a saber tooth cat, move like a mammoth, and flap like a prehistoric monster bird? Little ones will get moving in this activity as they discover how ancient animals ran, swam, leaped, climbed, and traveled their way through Oregon's past.

You'll need:

- Animal Movement Cards
- Crayons or color pencils
- Scissors
- Optional: tape measure

What to do:

1. Cut out the animal movement cards.
2. Place cards in a pile or bin and select one at a time.
3. Can you move like the ancient animal? Act out the movement on the card. Make sure you have space for big movements!

Optional Extension:

- Use a measuring tape to see how far you can leap compared to a Sabertooth cat!
- Use a measuring tape to see how your arm span compares to that of a monster bird!
