## Nature's Building Blocks

Using nature's building blocks (sticks) little ones can explore and build their own shapes with this open-ended challenge. By allowing them the freedom to design, test, redesign, and build, they have the chance to develop creativity.

### You'll need:

- Sticks, in a variety of lengths

### What to do:

1. Explore outside to find sticks of different sizes.
2. Use the sticks to build different shapes, like square, triangle, rectangle, star, etc.
3. Count how many sticks it takes to build each shape.
4. Keep on building! What else can you build with the sticks? How big of a shape can you build?
