Spiral Snail Shell

A spiral, like a snail's shell, is a growing shape. It grows bigger swirl by swirl. With this craft little ones can create their own spiral on a paper plate and add it to the snail.

You'll need:

- Paper plate
- Scissors
- Glue
- Googly eyes
- Snail body template or paper to draw your own.
- Crayons, markers, paint, or other craft materials.

What to do:

1. Cut out the snail body from the template.
2. Draw a spiral on the plate to use as a guideline and then decorate with the craft material of your choice. Get creative!
3. Glue the paper plate to the snail body.
4. Glue the googly eyes to the snail.

Share your snail craft!
