Texture Collage

Create this easy texture collage to help little ones better understand their sense of touch and the world around them. It's a great hands-on project that is easy to assemble and is great for independent exploration.

You'll need:

- Sturdy cardboard or poster board
- Glue or tape
- Scissors
- Various textured items such as sandpaper, fabric, bubble wrap, foam board, wax paper, etc.

What to do:

1. Cut out small samples of the different materials.
2. Glue or tape down the materials onto the board.
3. Explore the board! How does it feel? Does this feel like anything you have?
4. Optional: label the materials.
