Who's Tooth?

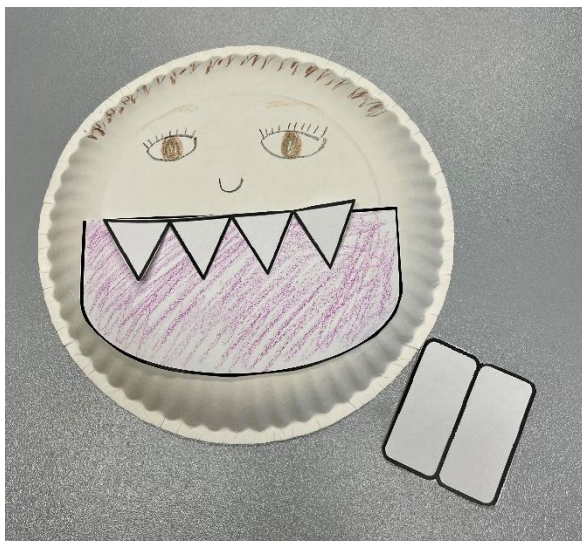

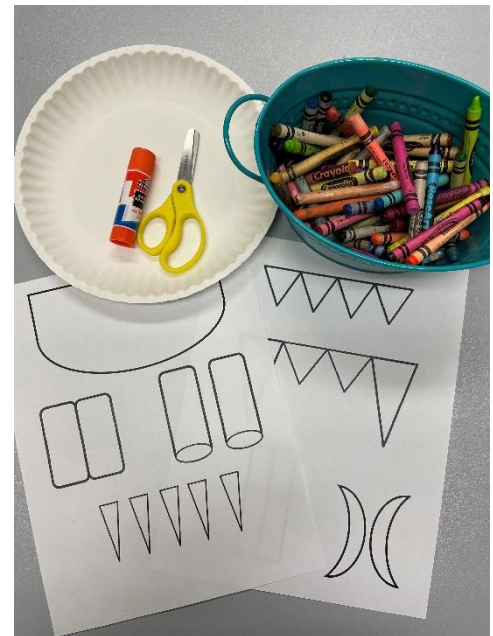

What if you had teeth like a shark or a beaver? In this craft, you can create a face that looks like you and try on different animal teeth. Which teeth do you like best?

You'll need:

- Teeth template
- Scissors
- Crayons, colored pencils, or markers
- Paper plate or blank piece of paper
- Glue

What to do:

1. Print out a set of animal teeth.
2. Cut out the different animal teeth.
3. Color the paper plate or paper to look like a face. Use the half circle as the mouth or draw your own open mouth.
4. Place the teeth in the mouth to see what it would look.
5. Optional: glue on the teeth of your choice.
